## Newly designed

The new and improved Whirl enables children from 12 months old to young adults to gradually develop and maintain their ability to weight bear by promoting excellent symmetry. It is suitable for children who require lower to higher levels of postural support and control. The Whirl is ideal for both school and home environments.

## Collaborating with you

Through working and collaborating with you, we have revolutionised the Whirl. We have adopted the essential elements of what your child needs from a stander; it provides excellent symmetry, it is extremely easy to use, it has multiple adjustments and, importantly, it is one that your child will enjoy using!

## Whirl technical data

all dimensions in mm unless stated

Size	1	2
Code	8351 <sup>1</sup> /8353	8352 <sup>1</sup> /8354
User weight limit (kg)	60	80
Thoracic support (top) to foot plate height	*630-1020	*760-1270
Pelvic support (top) to foot plate height	*410-830	*560-1030
Knee support (top) to foot plate height	*130-420	*165-520
Foot plate to floor height (excluding sandals)	70	70
Max width (between thoracic supports)	300	460
Tray size (depth and width)	610 x 390	700 x 800
Angle (°)	0 to 30	0 to 30
Base frame	890 x 660	1020 x 710
Shipping weight (including packaging) (kg)	38	40

## Supportive

The Whirl offers high levels of adjustment. Anterior, pelvic and knee supports are height, width and angle adjustable to achieve correct positioning. Pelvic obliquity can be managed through the pelvic support, which incorporates a de-rotational feature. A flip-up footrest completes the package.

**Anterior support**

**Multi-adjustable footrest**

## whirl key features

### Unique modularity

We understand that the uniquely modular aspect of the Whirl is still important. It enables you to change any of the chest, pelvic, knee or footrest components without changing the main frame. This allows you to customise the stander to suit your child's needs.

The Whirl comes in two sizes and has been designed with the growth of your child in mind.

### Improved footrest positioning

Reaching the optimum standing position for your child is key. The Whirl has a number of angles and adjustments that help with your standing programme. Our new multi-adjustable footrest moves in smaller increments to better position your child's feet – an essential element to their standing.

## How has the Whirl been improved?

- Even greater value for money and more affordable
- New slimline design gives you even better manoeuvrability
- Greater height adjustability, perfect for the smallest to tallest child
- Quick and easy adjustments make set-up effortless
- Incremental movements of the footrest now makes footrest positioning even more accurate
- New footrest adjustment allows for easier transfer
- Available in power and manual options

## Correct standing

Our new Whirl Terzo promotes independence but also encourages inclusion and helps children interact with their peers. The compact design makes the Whirl Terzo the perfect choice of stander for home and school. Suitable for children from 12 months old to young adults.

## Innovative design

The aim with the Whirl Terzo was to create a superior upright stander at an affordable price. Reaching the optimum standing position for your child is key, the 10° tilt (which is easily controlled by a gas strut) and the high levels of adjustability will assist you in achieving this.

## Improved manoeuvrability

The Whirl Terzo is an extremely compact stander and its design makes it highly manoeuvrable. Its small footprint means it fits up close to a table, once the tray is removed. This allows your child to participate in a range of activities.

## accessories

The Whirl and Whirl Terzo comes complete with anterior, pelvic and knee supports, cocoon sandals, activity tray and bowl with cover.

Modular parts such as the anterior supports, de-rotational pelvic supports and shoulder harness are interchangeable and work on both the Whirl and Whirl Terzo.

### Knee supports<sup>1</sup>

CODE KN006 - KN010

Height, width and depth adjustable to maintain knee position

### De-rotational pelvic supports<sup>2</sup>

CODE SP003, SP004, SP022, SP023

Adjusts and maintains hip position to control obliquity and rotation into a midline position

### Anterior supports<sup>2</sup>

CODE SP001, SP002, SP020, SP021

Adjustable to maintain trunk position

### Shoulder harness<sup>2</sup>

CODE HN015 - HN018

Provides support from the rear to encourage symmetry and spinal extension

### Tray grab rail full width

CODE GB001 - GB002

Helps to stabilise limbs and trunk

### Suspension rail

CODE SR001 - SR002

Can be used to attach toys for stimulation
