## Robust and durable

The Hardrock is an extremely durable and robust chair that has been specifically designed for children who are prone to rock repetitively. The Hardrock provides moderate levels of postural support and is suitable for both school and home environments.

## Tailoring to the child's needs

It can be a challenge to engage children with complex learning difficulties in educational and everyday activities. The Hardrock tackles this issue and offers a positive solution. It provides a safe environment and one that is conducive to learning.

## Posture matters

The Hardrock uses an anti-thrust system and anterior pad to provide secure postural management within clearly defined boundaries. Thoracic supports and stabilisers are available for children who exhibit sideways motion.

## Hardrock technical data

all dimensions in mm unless otherwise stated

Code	Size	Seat height	Width	Seat depth	Weight limit (kg)	Back height
8202	2	270-410	350	300-415	60	390
