Born out of collaboration

At the root of Smirthwaite lies the intrinsic belief that our product development should be a collaborative approach between experienced designers and respected therapists. That's why 38 occupational therapists and physiotherapists were involved in the design journey of indiGO. Their invaluable input has ensured a sharp focus on postural management, independence and social integration.

Social integration

IndiGO is a smart and stylish chair, ideal for use by teenagers both at school and at home. While delivering the necessary comfort and postural support through its discreet built-in thoracics and lumbar prompt, the chair is also designed to integrate seamlessly into any classroom environment.

Promoting independence

IndiGO has been designed for teenagers with mild to moderate postural needs, who want to achieve enhanced independence from their chair. The user operated brake, for instance, puts the user in control of applying and releasing the brakes without needing assistance – instantly giving them a sense of independence.

Customisable solution

IndiGO is customisable, in both colour (Black or Blue) and size (Size 4 and Size 5), to the needs of the user. For children with moderate needs, we offer a range of accessories that promote correct seating posture. A full range of accessories can be found on page 9. The chair has been designed with both the therapist's and the child's needs in mind. All adjustments can be made easily and mostly without tools.

indiGO

Choice of back

IndiGO has two available back sizes: a low back and a high back. The low back has been designed with social integration in mind and is best suited to a child with mild needs. The high back is more appropriate for a child who may need a harness or extra physical support.

Low back

High back

Choice of seat

Contouring of the seat is essential in users achieving the correct positioning. As children have differing support requirements, indiGO offers two choices of seat: a standard seat offering mild contouring and an enhanced seat offering more defined contouring.

Standard seat

Enhanced seat

indiGO technical data*

all dimensions in mm unless otherwise stated

| | Size 4 | | Size 5 | |
|--|-----------|------|-----------|------|
| Colour | Black | Blue | Black | Blue |
| Seat height from floor | 490 - 650 | | 490 - 650 | |
| Seat depth | 340 - 420 | | 390 - 470 | |

indiGO

key feature

Colour range

Contoured seat

The keystone to posture management is the pelvis and IndiGO's contoured seat helps to ensure that it is correctly positioned. There are two options of contoured seat available: standard and enhanced.

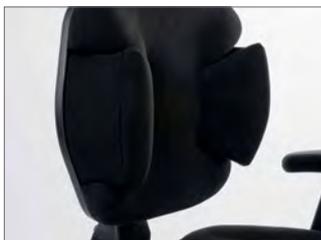

User operated brake

The unique and easy-to-use braking system puts the user in full control of the chair, delivering a feeling of independence.

Flip away armrest

The armrests are height adjustable and can also flip away when they are not needed. This is particularly beneficial when self-transferring from one chair to another.

Thoracic supports

The thoracic supports are adjustable, with an allen key, to give the user just the amount of support that they need.

Lumbar support

The lumbar is the region of the spine between the diaphragm and the pelvis, which supports the most body weight and is the most flexible. IndiGO's adjustable lumbar prompt allows the therapist to change the shape of the seat back in this region and provide a more comfortable position for the user.

indiGO

accessories

indiGO comes with two options of seats and backs; you can choose from a standard or an enhanced seat and from a high or a low back. indiGO comes complete with pelvic strap, flip away armrests and user operated brakes. You can also choose from two colours: black or blue.
